## BORDER

The border will be padded. The first step in creating the single layer of padding is to stitch the padding layer. For this you will use the Vineyard Silk or any round grey thread from your stash. The color does not need to match exactly, but it must be round. Round threads will allow the padding to stand up higher than the surrounding stitches.

The padding stitches will go lengthwise along each side of the border. These stitches should stop before the corner, below

Cover the padding with **Straight Gobelin**, below, using grey (NP146) Neon Rays Plus. These will be different lengths, following the changing width of the border.

The corners should be mitered, below. Because the adjacent sides are not the same, the miters may not be even. Use your own taste to make these corners look great.
